

HubSpot CRM Automation System

Master Customer Lifecycle Architecture

The system is built as four connected CRM workflows that manage the customer journey from initial enquiry through sales, onboarding, and lead reactivation.

NEW BUSINESS ENQUIRY	→	WORKFLOW 01 AI-POWERED CRM LEAD MANAGEMENT	→	WORKFLOW 02 SALES PIPELINE & FOLLOW-UP AUTOMATION	→	CLOSED WON	→	WORKFLOW 03 CUSTOMER ONBOARDING AUTOMATION
A prospect enters the CRM journey.	→	Captures, qualifies, organizes and routes the new enquiry.	→	Monitors active opportunities and ensures required sales follow-up is not missed.	→	The opportunity successfully becomes a customer.	→	Moves the new customer from a completed sale into an organized onboarding process.

INACTIVE OPEN DEAL — 30+ DAYS

WORKFLOW 04 CRM LEAD REACTIVATION SYSTEM	→	RETURN TO WORKFLOW 02 — SALES PIPELINE & FOLLOW-UP
Re-engages inactive opportunities and returns responsive prospects to active sales follow-up.	→	Re-engaged prospects continue under active sales management.
Central CRM Record	HubSpot keeps customer, company, deal and lifecycle information connected.
