

WORKFLOW 01 — AI-POWERED CRM LEAD MANAGEMENT

PURPOSE: Convert a new business enquiry into a structured, qualified HubSpot opportunity with the right context, ownership and communication for human sales follow-up.

CRM RECORD & DECISION LOGIC	SYSTEM COMPONENTS & HANDOFF
- Existing Contact / Company → update or reuse the relevant record. - Existing Deal? → YES: reuse the existing opportunity. - Existing Deal? → NO: create a new Deal and record the current enquiry reference. - Deal record → maintain lead source, service interest, qualification, priority, next action and relevant enquiry/workload information. - Associate the Deal with the appropriate Company record.	Website → n8n → AI Qualification → HubSpot CRM HubSpot manages Contact, Company and Deal records and sales ownership. Client communication → confirmation that the enquiry was received and processed. Internal communication → assigned sales owner receives notification that the enquiry requires attention. Human control → sales team reviews the qualified opportunity and decides the next business action.

ARCHITECTURE PRINCIPLE: *The automation organizes, qualifies and prepares the opportunity; the human sales team retains control over the final sales decision and follow-up.*
